Hello World

Directions

1. Open JCreator
2. From the File menu select New
3. Then select File
4. Select The Java classes folder
5. Select Empty Java Class
6. Click Next
7. Change the location to where you would like the file saved.
8. Change the File Name to HelloWorld
9. Type the following into the file:

```
public class HelloWorld
{
    public static void main(String[] args)
    {
        System.out.println("Hello World!");
    }
}
```
10. From the Build menu select Build File
11. The IDE will try to compile the file.
 - a. The output window will display "Process completed." if the compile was successful
 - b. The output window will display a list of errors if the compile was unsuccessful.
 - i. These errors must be fixed and then step 10 repeated
12. From the Run menu select Run File
 - a. The output window will display Hello World!

Rubric (counts as 1 other grade)

Points	Task
100	Displays "Hello World!"
